USA's Mission Statement

Respect for nature, education of the senses and fun at any age has been, for more than 30 years, the signature of Véronique Debroise's games and arts & craft kits.

When the French perfume maker (a graduate from the Versailles Fragrances Institute) founded Sentosphère in 1988, she caused a big stir in the toy industry by creating and launching the first olfactory games (such as Follow Your Nose). Her vision was (and still is) that everyone, starting from a young age, should have the right and ability to discover their sense of smell and burgeoning artistic talents.

She therefore created an entire range of games to encourage children's curiosity and innovation, all the while enticing their sense of smell, taste, art and science!

Each product is meticulously designed and tweaked to seamlessly blend learning and having fun. What better way to let them explore their creativity, imagination and talent?

To maintain the highest standards, Sentosphère controls the entire production process, from original concept, to design, all the way up to manufacturing and sales. All products are mainly made in France, are held to the strictest quality control standards and in line with the company's own values - developed in environmentally friendly conditions.

All children deserve the best. That is our daily goal!

Soaps & Scents 8+

With this kit create your own delightful high quality soaps thanks to the transparent glycerin soap base supplied. This base will melt in a few seconds in your micro-wave oven. Your child can add scents and colorants to the liquid soap and then pour it into the mold. In a few minutes the soap will harden and take the shape of flowers, seashells, dolphins...

This product has been medically tested and can be used on the most delicate skins.

Aquarellum PHOSPHO

Thanks to its phosphorescent masked outline, children will be able to carry out with the same ease as with a classic white masked outline, the colouring of their painting. The palette of 7 basic colours, as intense as they are bright, will allow them to create wonderful shades that will highlight the drawing. After a few minutes under a halogen or in the sun, the contours of their painting will illuminate in the darkness or at night.

Ideal to fall asleep between mermaids, unicorns or in the universe of galaxies to make beautiful dreams.
